Function Structure

Link[1]

Timing:

- 00:00-00:50 introduction

- 00:50-04:20 overview

- 04:20-09:00 astronomy lesson: fusion (can skip)

- 09:00-17:20 function arguments (a.k.a. parameters)

- 17:20-28:20 the stepdown rule

- 28:20-40:50 switch statements and independent deployability (can skip; goes elsewhere?)

- 40:50-43:30 functional programming

- 43:30-47:30 function side-effects, temporal coupling

- 47:30-51:30 command-query separation

- 51:30-56:30 tell don't ask

- 56:30-60:00 structured programming

- 60:00-63:00 early returns

- 63:00-66:00 error handling (can skip; goes elsewhere?)

- 66:00-75:00 exceptions (can skip; goes elsewhere?)

- 75:00-80:00 special cases (can skip; goes elsewhere?)

- 80:00-87:00 null is not an error. null is a value (can skip; goes elsewhere?)

- 87:00-88:00 "try" is "one thing" (can skip; goes elsewhere?)

- 88:00-92:10 conclusion (yuck)

- 92:10-94:30 end credits (can skip)
